PLANATOL®

Plana Dots – the quick and easy way to stick

Plana Dots are glue dots coated with pressure-sensitive adhesives for all kinds of professional packaging.

Simply pull the individual glue dots off the silicone paper and press them onto the respective material. Whether you want to stick reply cards, samples, promotions, memo notes or decorations – onto paper, cardboard, foil, metal, glass, plastic or textiles ... the versatile Plana Dots by Planatol are ideal for all frequent glue applications.

Plana Dots are ideally suited for

- direct marketing and advertising campaigns
- sticking on specimens and samples
- sticking on plastic cards, CD's, and similar items
- product presentations
- decorations and creative work in commercial, educational or private areas
- packaging jobs
- as assembling aid

Handy glue dots straight from the roll

The glue dots are delivered on a silicone paper roll in a convenient dispenser box or handy industrial package. Quick to use, spot-on positioning, clean to work with! Plana Dots are perfect for fixing, sticking, hanging up, draping and bonding.

Plana Dots Dispenser

The Dispenser automates the application of Plana dots.

If dots are processed in large numbers, the Plana Dots Dispenser is a handy and time-saving assistant. After one dot has been removed, the Dispenser automatically moves to the next dot and stops, thus serving as a „third hand“ in the sticking process.

Use the Plana Dots Dispenser to process glue dots in an easier and more efficient way.
