

tesa® grip tape solutions for increased process security

tesa® grip tape solutions offer enhanced security and continuity throughout the whole printing process. Profit from our decades of experience as the pioneering manufacturer of the original grip tape solutions and ensure process security and increased output.

tesa® 4563

tesa® 4563 has a smooth silicone rubber coated surface that repels substances that either hinder or stick. The optimised adhesive system offers increased process security and performance.

tesa® 4563 is particularly well suited to fabric label printing. By wrapping the central drum cylinder, you can improve continuity and security in the printing process.

tesa® 4863

tesa® 4863 has an embossed silicone-rubber coated surface, providing increased security in the printing process. The optimised adhesive system increases process security even further.

tesa® 4863 is ideal for roller wrapping in flexographic printing and is even used by tape manufacturers themselves. The embossed surface means that residues do not limit the anti-slip performance.

tesa® Grip tapes

Product	Thickness [mm/mil]	Colour	Backing	Liner
tesa® 4563	0.42 / 17	Grey (shiny)	Fabric, silicon-rubber coated	PP Film
tesa® 4863	0.62 / 24	Grey (embossed)	Fabric, silicon-rubber coated	PP Film

Take the tesa-test!

A strip of tape checks the bond between ink and substrate. With tesa film 4104, you can carry out an uncomplicated quick-test – the “tesa-Test”. This check method is according to the cross-cut test (DIN EN ISO 2409).

Position of the adhesive tape in relation to cross-cut surface

Position of the adhesive tape before peeling it off the cross-cut surface
